INDESTRUCTIBLE PAINT WIN FRENCH AERO ENGINE COATINGS CONTRACT

Following intensive evaluation, Turbomeca, the French aero engine company is the latest to adopt a number of specialised aerospace coatings from Indestructible Paint Ltd., Birmingham.

Providing coatings that meet at least six Turbomeca performance and application specifications, Indestructible Paint is now Turbomeca's sole source for these products, and replaces previous suppliers.

The recently approved materials will be used on a range of engines including the Adour, Arriel, Astazou RTM322 and others.

These engines, used variously in Eurocopter models such as the Puma and Tiger, and aircraft including the Goshawk and AV8B, are also used to power SNCF trains.

The coatings, applied in accordance with Turbomeca specification CT6010, include:-

- A low toluene, free of xylene; clear magnesium protective coating
- Low VOC xylene, toluene and chromate free air drying primers and finishing colours for use at temperatures up to 180° C
- Ten chromate free stoving colours and primers for magnesium and high temperature use
- Ipcote sacrificial inorganic aluminium coatings
- Rockhard erosion resistant coatings
