

Product Name

VERY SMOOTH HIGH TEMPERATURE ALUMINIUM

Product Description

One part high temperature silicon aluminium coating designed for very smooth surface finishes for use particularly on aeroengine parts. As an alternative to DTD900 and Ruskilla 2845 aluminium coatings this product is easily available and used in such areas as jet engine turbines for improving compressor efficiency.

Approvals

MSRR 1009
Alternative to DTD 900/4124A - TN 1016 M3, Croda 2845.

Performance

Withstands 100 hours at 600°C

Application

Spray applied. Apply for RPS 661/17.

Physical Properties

Mixing Ratio	One Part Product
Thinner	No thinner required, use IP9064/thin to clean down
Supply Viscosity	Ready for use
Colour	Very smooth gloss aluminium
Gloss Level	Gloss
Film Thickness	25 microns
Flash Point / Class / UN No	≥21°C < 32°C / 3 / Paint UN1263
Pack Size	5 litres
Shelf Life	12 months
Coverage
